Life expectancies allow for mortality improvements (a principle accepted in Golden Eagle International Trading Pty Ltd v Zhang [2007] HCA 15).

Life expectancies are derived from medium series projections published by the Australian Bureau of Statistics in "Population Projections, Australia, 2017 (base) - 2066". These were revised in November 2018 and differ from previous year projections.

This publication is available for download on our website.

It is provided as a general reference source on the understanding that users exercise their own skill and care with respect to its use.
